

Think Green,
Burn Clean®

Exceptional performance adding value to your business by way of increased productivity, enhanced profitability and optimal customer satisfaction

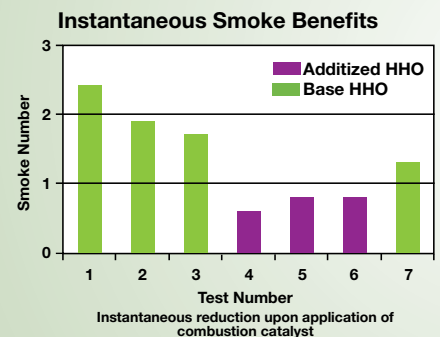

Think Green, Burn Clean[®].
That's the result of home heating oil with
Greenburn[®] Combustion Technology.
Proven around the world, our technology
is formulated to deliver advanced
performance for you and your customers.

**WHEN YOU USE
 GREENBURN Combustion
 Technology, THE BENEFITS
 ARE IMMEDIATE AND
 SUSTAINED...**

Emission reductions are just the beginning of Greenburn's performance. Less smoke and soot means a cleaner heat exchanger and a reduction in overall oil consumption, providing customers the same level of home comfort for less money, as shown in the graph below.

Data generated by Brookhaven National Laboratory

Your customers will also benefit from:

- **Cleaner filters, strainers & nozzles** which will reduce unscheduled service calls and provide a healthier bottom line for you and peace of mind for your customer.
- **Corrosion defense** for optimum protection of the fuel system components.
- **Storage integrity** to reduce sediment and sludge formation, allowing for cleaner, more stable fuel.

**YOU'LL ALSO BENEFIT
FROM GREENBURN'S
FIRESIDE PROTECTION**

Fireside protection reduces deposits to provide long-term cleanliness even with 2000 ppm sulfur heating oils. Fewer deposits lead to improved efficiency, decreased maintenance costs and longer equipment life.

Heat Exchanger Optimization
Long Term Burner Testing (at 250 Hours)
Performance validated by TUV Nord Systems

**MORE COMFORTABLE
CUSTOMERS— IN MORE
WAYS THAN ONE**

For customers, home heating oil optimized with Greenburn doesn't just mean cleaner-burning heating oil; it also means reassurance, the reassurance of enhanced system performance and additional fuel efficiency. That's home-heating comfort and peace of mind for your customer—and a real marketing opportunity for you.

Greenburn is compatible with Bioheat and complements its use which means it's ready for today's and tomorrow's heating oil. Greenburn is the advanced fuel solution when low-risk and high-reward marketing are desired.

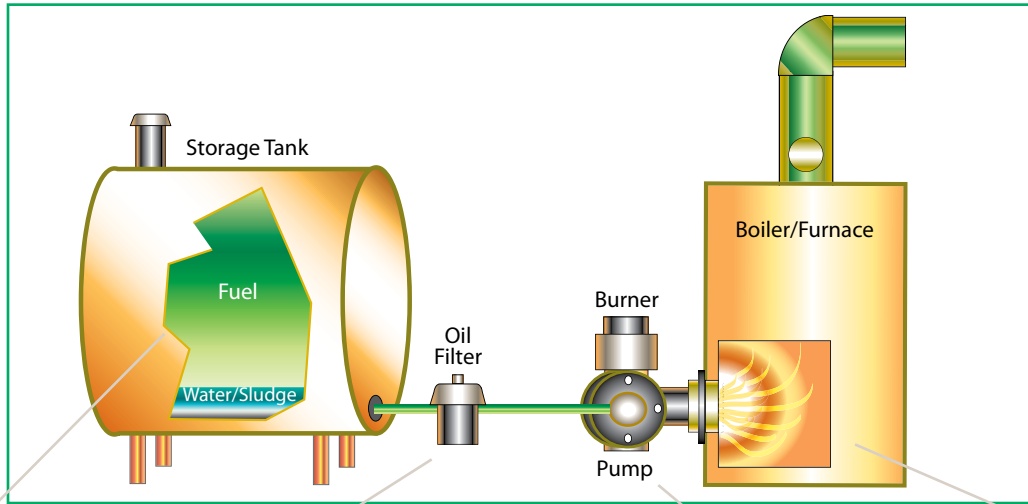

**UNRIVALED COMFORT
CAN FUEL NEW SALES
AND PROFIT**

If you want to offer an unprecedented level of customer satisfaction, unrivaled product performance, or simply increase profits through the use of a market-leading brand, Greenburn is the solution.

For more information, talk to your AFS representative. Together, we can set new standards in comfort and sales with Greenburn Combustion Technology: Fuel for thought from AFS.

From wetside to fireside, Greenburn combustion technology cleans up systems and provides fuel efficiencies through combustion optimization.

IN THE TANK: IMPROVED FUEL CLEANLINESS

- Reduced sediment formation
- Corrosion protection

IN THE FILTERS: IMPROVED FILTERABILITY

- Reduced clogging due to tank sedimentation

AT THE PUMP: IMPROVED LUBRICITY

- Smoother, more reliable pump operation

IN THE BOILER: IMPROVED EFFICIENCY

- Lower emissions
- Reduced soot
- Fewer deposits
- Less maintenance
- More heat transfer

ABOUT AFS

Founded by Paul Nazzaro in 1996, AFS has earned a reputation for supplying the fuel industry with exciting, innovative and performance-driven fuel treatments complemented by fuel-quality advisory services. With nearly thirty years of industry expertise and an eye for future demands Nazzaro has spearheaded countless premium fuel programs for industry wholesalers and independent fuel dealers. AFS is recognized as a respected market leader, developing the advancement of biodiesel and Bioheat. With both the future and his customers in mind, Nazzaro now shares his vision with his sons, Paul and Nick, to ensure a positive experience for the next generation. Fuel treatments for both middle distillates and biofuels are just one element of AFS services. Fuel Quality Advisory Services and additive handling systems make AFS a one-stop shop for all your fuel quality needs.
